Vijender Kumar

Software Engineer (5.7+ Years of Experience)

+91 8700228181 | vijbirhman2017@gmail.com | linkedin/vijenderkumarbirhman | github.com/VijenderKumar

SUMMARY

Software Engineer with **5+ years of experience in Spring Boot and Microservices,** specializing in scalable backend systems and distributed architectures. **Delivered performance gains and 35% cost reduction** through **AWS ECS Fargate** migration and batch optimization, with strong expertise in **Spring Batch, APIs**, and cloud-native systems.

PROFESSIONAL EXPERIENCE

Software Development Engineer II — Aug '23 - Present

Omnifi AI Technology Private Limited — Gurugram, IN

- **Led migration from EC2-based cron jobs to AWS ECS Fargate,** redesigning to an **event-driven, on-demand architecture,** reducing infrastructure costs by **35**% and improving scalability and fault isolation.
- Enhanced **co-lending and LOS/LMS** systems using Spring Boot & Spring Batch for clients like **SaveIn, ShopKirana, Cashfree, Finsall & PayNearby**
- Optimized **Spring Batch** workflows for bulk document processing, achieving a **40% increase in processing speed**.
- Built **automated email workflows** using AWS Lambda, S3 & EC2, reducing missed payments by **30%** and boosting user engagement by **20%**
- Built **scalable backend services** supporting, while boosting deployment efficiency by **40%** via AWS Code Commit.
- Improved system reliability and observability by **enhancing logging, error handling, and retry mechanisms**, reducing production incidents and recovery time.

Software Development Engineer I — May '22 - Jul '23

Arthmatetech Private Limited — Gurugram, IN

- **Integrated third-party APIs,** improving data exchange **efficiency by 30% and increasing data accuracy by 40%.**
- Optimized **MongoDB queries and indexing**, improving performance by **25%** and reducing latency.
- Implemented **API security best practices**, reducing vulnerabilities by **50%** across services.
- Created and maintained **API documentation,** reducing onboarding time and support queries by **25%.**
- Built and maintained **detailed API documentation**, improving onboarding efficiency and cutting support requests by **25%**

Assistant System Engineer — Aug '20 - May '22

Tata Consultancy Services — Gurugram, IN

- Led **Gradle migration**, improving build efficiency and standardization across applications.
- Managed secure file transfers via **SAG Web Methods portal**, ensuring **high data integrity and compliance**.
- Enforced **secure coding practices and data confidentiality**, minimizing risk exposure.

KEY SKILLS

Programming Languages: Java (8+), JavaScript, NodeJS
Frameworks: Spring Boot, Spring Batch, Microservices
Database: MySQL, MongoDB, PostgreSQL
Concepts: OOP, Multithreading, REST APIs
Tools: AWS (S3, EC2, ECS Fargate, Lambda), Postman, Git, Maven

COURSEWORK

Data Structures and Algorithms, Fundamentals of Programming Language, Object-Oriented Programming, API Development (RESTful), Unit Testing, Linux Operating System, MVC Architecture, Design Pattern, System Design

EDUCATION

Master of Computer Applications (Dual Degree) — Aug '15 - Sep '20

Guru Gobind Singh Indraprastha University
86.9%

CERTIFICATIONS

- **AZ-303: Microsoft Azure Architect Technologies | Microsoft | Mar'21**
- **Microsoft Certified: Azure Fundamentals | Microsoft | Oct'20**
