SUMMARY

Software Engineer with 6+ years of experience in Spring Boot and Microservices, specializing in scalable backend systems and distributed architectures. Delivered performance gains and 35% cost reduction through AWS ECS Fargate migration and batch optimization, with strong expertise in Spring Batch, APIs, and cloud-native systems.

PROFESSIONAL EXPERIENCE

Software Development Engineer III (Promoted from SDE II in Jul '26) Aug '23 - Present

Omnifi AI Technology Private Limited Gurugram, IN

- Integrated ICICI Bank Composite Payment and Status Check APIs using Java & Spring Boot, implementing bank-specified RSA/ECB/PKCS1 and AES/CBC/PKCS5 encryption/decryption, encrypted request/response packet handling, Base64 encoding, session-key generation, and IV management.
- Led migration from EC2-based cron jobs to AWS ECS Fargate, redesigning to an event-driven, on-demand architecture, reducing infrastructure costs by 35% and improving scalability and fault isolation.
- Enhanced co-lending and LOS/LMS systems using Spring Boot & Spring Batch for clients like SaveIn, ShopKirana, Cashfree, Finsall & PayNearby
- Optimized Spring Batch workflows for bulk document processing, achieving a 40% increase in processing speed.
- Built automated email workflows using AWS Lambda, S3 & EC2, reducing missed payments by 30% and boosting user engagement by 20%
- Built scalable backend services supporting, while boosting deployment efficiency by 40% via AWS Code Commit.
- Improved system reliability by enhancing logging, error handling, and retry mechanisms, reducing production incidents and recovery time.

Software Development Engineer I (Internal Transfer to Omnifi AI Technology Private Limited) May '22 - Jul '23

Arthmatetech Private Limited Gurugram, IN

- Integrated third-party APIs, improving data exchange efficiency by 30% and increasing data accuracy by 40%.
- Optimized MongoDB queries and indexing, improving performance by 25% and reducing latency.
- Created and maintained API documentation, reducing onboarding time and support queries by 25%.
- Built and maintained detailed API documentation, improving onboarding efficiency and cutting support requests by 25%

Assistant System Engineer Aug '20 - May '22

Tata Consultancy Services Gurugram, IN

- Led Gradle migration, improving build efficiency and standardization across applications.
- Managed secure file transfers via SAG Web Methods portal, ensuring high data integrity and compliance.
- Enforced secure coding practices and data confidentiality, minimizing risk exposure.

KEY SKILLS

Programming Languages: Java (8+), JavaScript, NodeJS

Frameworks: Spring Boot, Spring Batch, Microservices

Database: MySQL, MongoDB, PostgreSQL

Concepts: OOP, Multithreading, REST APIs

Tools: AWS (S3, EC2, ECS Fargate, Lambda), Postman, Git, Maven

COURSEWORK

Data Structures and Algorithms, Fundamentals of Programming Language, Object-Oriented Programming, API Development (RESTful), Unit Testing, Linux Operating System, MVC Architecture, Design Pattern, System Design

EDUCATION

Master of Computer Applications (Dual Degree) Aug '15 - Sep '20

Guru Gobind Singh Indraprastha University
86.9%

CERTIFICATIONS

- AZ-303: Microsoft Azure Architect Technologies | Microsoft | Mar'21
- Microsoft Certified: Azure Fundamentals | Microsoft | Oct'20
